

## ChromoBio® CANDIDA

A selective and differential chromogenic medium for isolation and differentiation of major clinical-significant *Candida* spp.

| Dehydrated media                 |                                 |  |  |
|----------------------------------|---------------------------------|--|--|
| Code number:                     | 500 g: CAN20500, 5 kg: CAN25000 |  |  |
| Colour:                          | Yellowish                       |  |  |
| Appearance:                      | Homogeneous hygroscopic powder  |  |  |
| pH before sterilization (25 °C): | 5,9 - 6,3                       |  |  |

**Direction:** Suspend **48 g** in one litre of distilled water and heat with frequent agitation until the medium boils well. Mix well before pouring.

## Warning!

The medium is heat sensitive. No further sterilisation is necessary or desirable.

| Prepared media |                                    |  |  |  |
|----------------|------------------------------------|--|--|--|
| Bottled media: | 100 ml: CAN30100, 500 ml: CAN30500 |  |  |  |
| Plated media:  | 55 mm: CAN50055, 90 mm: CAN50090   |  |  |  |
| Colour:        | Yellowish                          |  |  |  |
| pH (25 °C):    | 6,0 - 6,2                          |  |  |  |

**Direction:** Dispense the melted bottled media aseptically into sterile Petri-dishes. Media in Petri-dishes are ready to use.

## FORMULA in g/l

| Peptones                     | 10,0 |
|------------------------------|------|
| Glucose                      | 20,0 |
| Chromogenic substrate        | 1,5  |
| Chloramphenicol + gentamicin | 0,5  |
| Agar                         | 15,0 |

**Note:** The typical formula can be adjusted to obtain optimal performance.

**Storage conditions:** Store the dehydrated media tightly closed in a dry place at room temperature. Store the bottled media protected from light at room temperature. Store the plated media protected from light at 2-8 °C. Use before the expiry date on the label.

## **Quality control:**

| Test strains       | Incubation temp: 25 °C | Growth               | Incubation time: 48 h |
|--------------------|------------------------|----------------------|-----------------------|
| Candida albicans   | ATCC 10231             | Good, green colonies |                       |
| Candida krusei     | ATCC 14243             | Good, pink colonies  |                       |
| Candida tropicalis | ATCC 1369              | Good, blue colonies  |                       |
| Escherichia coli   | ATCC 25922             | Inhibited            |                       |

In vitro diagnostic - for professional use only!
